EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

1. (Previously presented) A computer-implemented method for facilitating trading of orders in a batch process, comprising:
determining, by a computer, for each order in a batch, a premium for the order at a particular price, wherein for a respective order, the particular price is adjusted in accordance with the premium when setting a price for pairing, and
pairing, by a computer, the orders in the batch in accordance with their respective premiums, wherein the premium for an order depends on the size of the order that is [matchable] **matched** with at least one contra side order, and when a portion of the order is unmatchable in a pairing, the method further comprises reducing the size of the order by the size of the unmatchable portion and determining a new premium for the order in accordance with the reduced order size.

10. (Previously presented) The method of claim 6, wherein a pairing includes a buy order and a sell order, and wherein said automatically setting marks the pairing as [unmatchable] **unmatched** when the premiums indicate lack of a mutually acceptable price.

11. (Currently amended) The method of claim 10, wherein the premiums indicate lack of a mutually [acceptable] **accepted** price when:

[[i)] the buy order is demanding a premium that is greater than the premium offered by the sell order[.];

[[ii)] the sell order is demanding a premium that is greater than the premium offered by the buy order[.]; or

[[iii)] the buy order and the sell order are both demanding premium

12. (Original) The method of claim 1, further comprising automatically adjusting the price for a pairing when one of the orders in the pairing is also participating in an [unmatchable] **unmatched** pairing.*

30. "A tangible computer-**readable** medium having executable instructions...**when** executed, cause the computer to:

*Also change unmatchable to unmatched and matchable to matched in the rest of the claims.

2. The following is an examiner's statement of reasons for allowance:

The Office Action rejected Claims 1-12, 14-17, and 19-31 under 35 U.S.C. § 103(a) as being unpatentable over May (U.S. Patent No. 6,317,727). May, however, does not teach or suggest what is claimed in Claims 1-12, 14-17, and 19-35.

In contrast to May, Claim 1 of the present application calls for "determining, by a computer, for each order in a batch, a premium for the order at a particular price, wherein for a respective order, the particular price is adjusted in accordance with the premium when setting a price for pairing," and "pairing, by a computer, the orders in the batch in accordance with their respective premiums." Further according to Claim 1, "the premium for an order depends on the size of the order that is matched with at least one contra side order, and when a portion of the order is unmatchable in a pairing, the method further comprises reducing the size of the order by the size of the unmatchable portion and determining a new premium for the order in accordance

with the reduced order size." May does not teach or suggest determining a premium as claimed in Claim 1. The premiums in Claim 1 are determined "for each order..., at a particular price, wherein for a respective order, the particular price is adjusted in accordance with the premium when setting a price for pairing." The "different price levels" mentioned by May are not "premiums" as claimed in Claim 1, but only the particular prices of the orders as entered by the users. May also fails to teach or suggest "when a portion of the order is unmatchable in a pairing reducing the size of the order by the size of the unmatchable portion and determining a new premium for the order in accordance with the reduced order size," as claimed in Claim 1. The Office Action did not cite, nor has applicant found any disclosure in May that suggests these features. In addition, where May does not teach or suggest determining a premium as claimed in Claim 1, May also fails to teach or suggest "pairing, by a computer, the orders in the batch in accordance with their respective premiums."

Thus the aforementioned claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
